Time Series of India's economic indicators built on a strong foundation of Accuracy, Completeness and Timeliness

EPWRF India Time Series Structured in 14 Modules:

- National Accounts Statistics of India
- Domestic Product of States of India
- Price Indices
- Agricultural Statistics
- Combined Government Finances
- Annual Survey of Industries
- Industrial Production Series
- External Sector
- Financial Markets
- Banking Statistics (BSR)
- Finances of Government of India
- Finances of State Governments in India
- Insurance
- Power Sector
- Health Statistics

National Accounts Statistics of India

Description:

The National Accounts Statistics of India (NAS) module presents the latest available data for the period from 1950-51 to 2009-10 (1950-51 to 2011-12 for some characteristics) all as per the new series of national accounts statistics with 2004-05 as the base year. The data will get updated from time to time.

The series presented here covers every segment of the Indian economy as depicted in the CSO's national accounts aggregates. Broadly, it covers the following data sets:

- 1.national income and other key related macro-economic aggregates;
- 2.sectoral distribution of GDP;
3. domestic saving by type of institutions (household financial saving by assets); capital formation by type of assets and by institutions and sectors and private final consumption expenditure by objects;
4. Public sector transactions.
5. Consolidated accounts of the nation encompassing expenditure on gross domestic product (GDP), appropriation of national disposable income, financing of gross accumulation, and aspects of external transactions.

Disaggregated Statements Consisting of Outputs, Inputs and GDP by sectors and commodities:

1. input-output relationships by major industry groups;

Health Statistics

Description:

Health module is presented in five major components namely, Demography, Health Status Indicators, Health Infrastructure, Human Resources in Health and Health Education Facilities. Data are culled out from two publications – National Health profile and Statistical Report of Sample Registration Survey (SRS). However, data on Health Finance are compiled from state finances published in RBI Bulletin. National Health Profile was earlier published as "Health Information of India" from 1986 to 2004 and as "Health Statistics of India" prior to 1986. As the publication has undergone changes over the period, the data provided has also changed over period. Hence, data series pertaining to some variables was discrete and inconsistent. Such variables are highlighted in the respective sections. While the National Health Profile is the major source of data, Statistical Report of SRS is primarily used for data on fertility and mortality indicators. SRS reports have been providing relatively consistent data over a period.
